

ECOWEB

FROM RESEARCH TO REALISATION

Your gateway to EU-funded eco-innovations

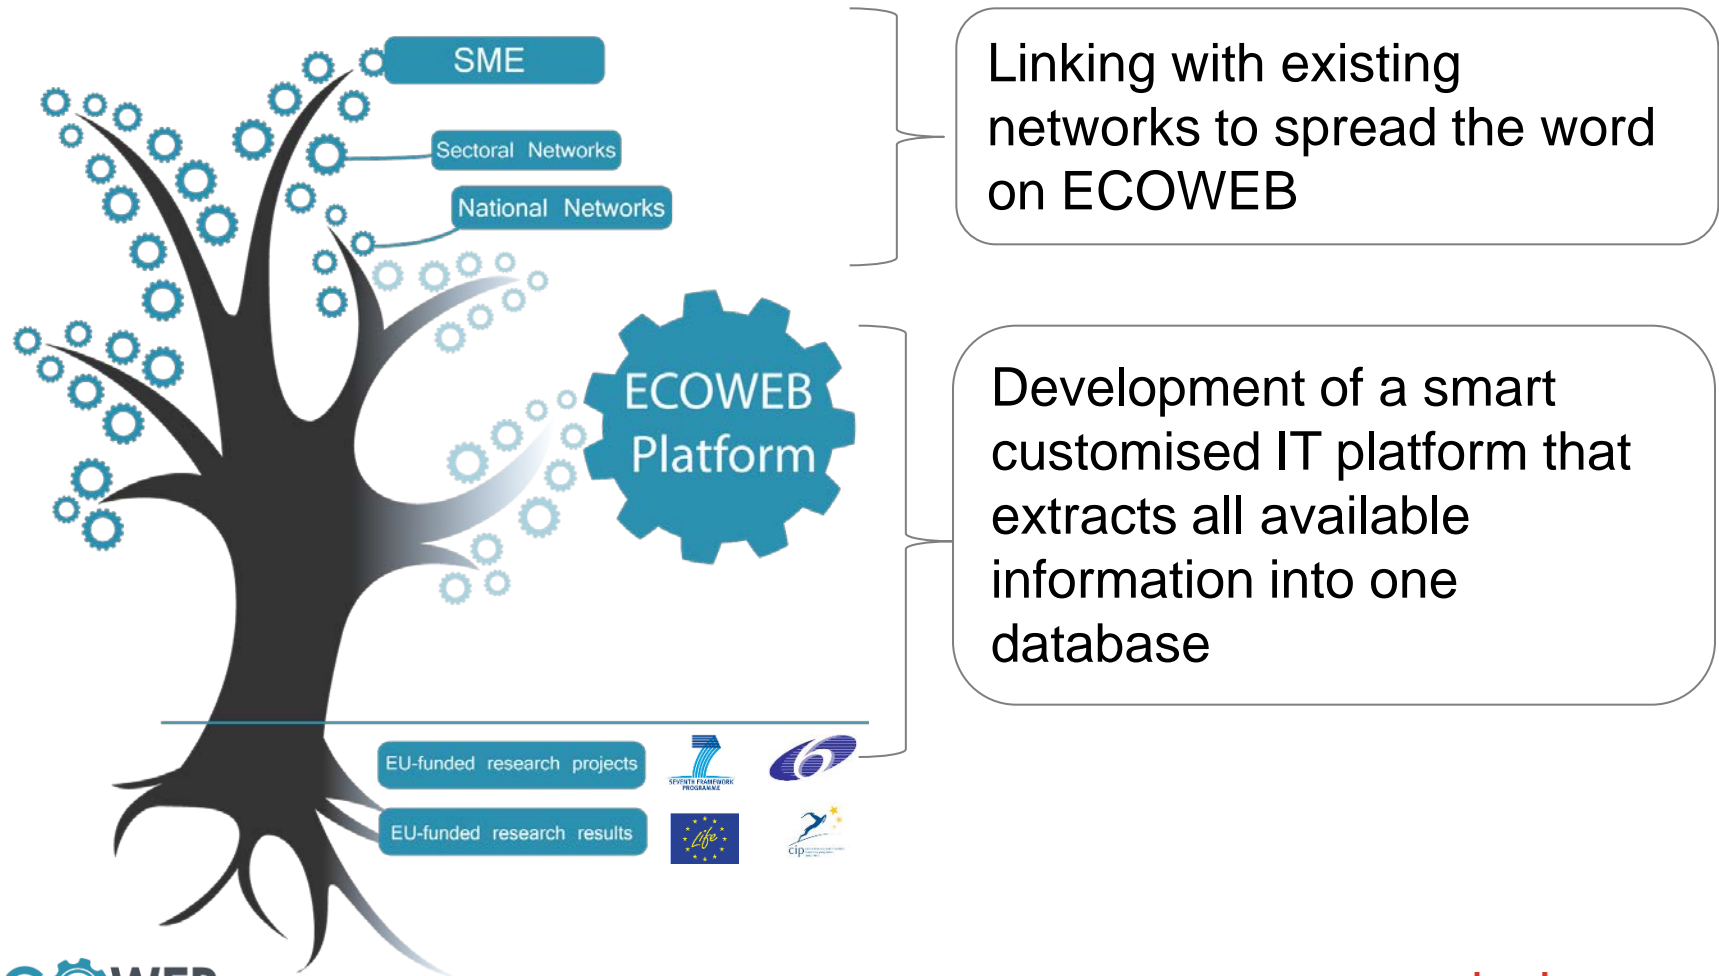

ECOWEB Project status
1th of July, 2013

- Improve the knowledge & technology transfer of EU-funded eco-innovations to SMEs
- Increase collaboration between research, business and networks of enterprises
- Streamline the dissemination of EU-funded R&D eco-innovative results into a 1-stop shop with quick and intuitive design

Georg Melzer, Coordinator of ECOWEB says:

“Take-up of EU funded research has always been a challenge. ECOWEB will actively promote top EU research and make it visible.” Knowledge that has been locked away in obscure websites will be pushed through existing networks and turned into products.

Raising awareness for existing eco-innovations?

Thank you for your attention!
